

# Programming the Roller Shade-II System

(Please read this guide first before programming the system)

## **Step 1** Disconnect Power for 30 seconds

**Connect the power to the Motor, within 20 seconds, there will be a short whistle which means it is in programming mode.**

**The Programming Mode will last for 20 seconds for EACH step.**

**If there is no action taken within 20 seconds in any step, or a mistake during the course of programming, it has to start all over again from the beginning (i.e. power must be off for 30 seconds, then connect it and wait for a short whistle).**

## **Step 2**

Press left/right **Channel** button to turn channel# 1 light on (or any channel number that you like)

Press and hold **SET** button till it sounds a long whistle from short beeps.

# Setting Lower/Upper Limits

First, set the Lower Limit as the Shade is rolled up when mounted.

## Step 3

Press **SET** button for a few seconds till it changes short whistles to a long whistle

Press **Down** button once and the Shade will keep moving down.

Press **STOP** button once when the Shade drops to the position desired.

Press **STOP** button first, then the **DOWN** button at the same time till it sounds a long whistle. (usually within 1 second)

## Step 4

Press **UP** button once the Shade will keep moving up.

Press **STOP** button once when the Shade is at the position desired.

Press **STOP** button first, and then the **UP** button at the same time till it sounds a long whistle. (usually within 1 second)

## Done

## Other Functions:

### Changing the Rolling Direction

Press UP and DOWN positions at the same time, loose two buttons when there sounds a long whistle. Then the position is changed.

#### Remarks:

This function should be done before programming the upper/lower limits. Otherwise, you may have to program the upper/lower limits again as these limits might not be the same when they are reversed.

### Clear All Programming

#### Step 1

Power off the Motor for 30 seconds, then connect it and wait for a short whistle.

#### Step 2

Press STOP and SET buttons together till it sounds a long whistle. All previous works are cleared. You may continue to Step 2 for programming if wanted.

### Operate All Channels

Channel indicator light

Press LEFT and RIGHT Channel buttons at the same time, all channel lights will be on. Press UP/DOWN button to operate all systems.
